

Konica SLR Lens Mounts

There were 2 basic series of Konica 35mm SLR bayonets. The first was the F series, used with the Konica F, FS, FSW, FP and FM (also the Revue SR and Wards SLR700), beginning c. 1960.

Original Konica F mount

Konica F Automatic

Konica F Preset

In 1967, a new lens mount was introduced with the full/half frame Konica Auto Reflex. This mount, called the AR mount, continued through the Autoreflex series and the FS1, FC1, FP1, FT1 and TCX, to the end of Konica SLR production.

Konica AR Automatic

Konica AR Preset

Note that the Konica F and AR mount series are NOT interchangeable with each other.
